This is our signature massage for rejuvenating maturing skin of the face. This special technique lifts, tones and firms skin through a series of specialized facial massage strokes, leaving a glowing look for days. Regular and frequent treatments over time help train your muscles to be firmer and tighter. To extend the energizing experience, we include a massage to the hands, feet, shoulders, back, neck and scalp. This is the most luxurious treatment we offer.

Lastone Therapy:

This treatment takes massage to a new level of relaxation...heated basalt stones melt and smooth away areas of tension and energy blocks. Warm smooth stones are rolled, glided and placed on specific areas of the body. The heated stones penetrate into muscles to linger long enough to release tense muscles. Cool marble stones are used to flush away toxic build-up and renew energy.
